FROM FUNCTION TO FLEXIBILITY

This meticulously crafted renovation transforms a corporate hub into a vibrant, multifaceted haven that seamlessly integrates work, life, and leisure

Nestled along the Maa Flyover on AJC Bose Road in Kolkata, the revamped headquarters of Bisk Farm, a leading Indian FMCG company, seamlessly integrates office and residential spaces.

This comprehensive renovation focused on three core aspects: enhancing the façade, redeveloping the ground level, and redesigning the rooftop.

A sleek bridge connects the office and residential areas,

creating an inviting gathering space defined by intricate jaalis and perforations that balance transparency with privacy. The rooftop, shielded from the bustling streets by strategically placed louvers and landscaped terraces, offers a serene escape.

The building's street-facing façade has been updated with modern cladding and sleek signage, while a thoughtful material palette emphasizes subtle elegance, highlighting select architectural elements. +
